SIH 2026 INTERNAL HACKATHON EVALUATION RUBRICS

The following are the evaluation factors:

F1. Innovation & Creativity

- **Novelty of Idea:** How unique or innovative is the solution?
- **Out-of-the-box Thinking:** Does the project showcase creative problem-solving approaches?

F2. Technical Feasibility

- **Technical Complexity:** How complex is the solution from a technological standpoint?
- **Implementation Feasibility:** Is the proposed solution technically feasible with current tools and resources?
- **Scalability:** Can the solution be scaled up to accommodate larger needs?

F3. User Experience and Design

- **UI/UX Design:** How intuitive and user-friendly is the interface?
- **Accessibility:** Is the solution accessible to a wider range of users, including those with disabilities?

F4. Impact & Usefulness

- **Problem-Solution Fit:** Does the project effectively solve the problem statement?
- **Potential Impact:** What is the potential societal or market impact of the solution?
- **Use Cases:** Are there multiple scenarios where the solution can be applied?

F5. Technical Execution

- **Working Prototype:** Has the team built a functional prototype or MVP?
- **Code Quality:** How clean, efficient, and modular is the code?
- **Technology Stack:** Is the technology stack used appropriate for the problem?

F6. Sustainability & Future Scope

- **Long-term Viability:** Can the solution be maintained and developed further over time?
- **Environmental Impact:** Does the project consider sustainability or eco-friendly practices?

F7. Presentation & Communication

- **Clarity of Presentation:** How well did the team present their solution?
- **Answering Questions:** How effectively does the team address queries from judges?
- **Pitch:** Is the solution pitched in a convincing and engaging way?

F8. Collaboration and Teamwork

- **Team Dynamics:** How well did the team collaborate and distribute responsibilities?
- **Problem-solving Approach:** Did the team adapt to challenges and feedback efficiently?

F9. Business Viability (if applicable)

- **Market Potential:** Is there a clear market or demand for the solution?
- **Revenue Model:** Does the team have a business plan or revenue generation model?
- **Cost-effectiveness:** Is the solution cost-effective and affordable?

F10. Security and Privacy

- **Data Security:** How well does the solution protect user data?
- **Privacy Considerations:** Does the solution respect user privacy and comply with regulations?
